PROFESSIONAL SUMMARY

Associate Consultant professional with 4 years of experience delivering Intelligent Automation, enterprise automation, Business solutions, Generative AI, Agentic AI, NLP, and RPA solutions. Hands-on experience with Automation Anywhere A360, UiPath, Python, workflow automation, OCR, RAG, prompt engineering, AI orchestration, requirement gathering, business process analysis, PDD/SDD, stakeholder collaboration, and production support. Experienced in translating business requirements into scalable automation and AI solutions for enterprise clients including Dell and Lilly.

CORE SKILLS

Intelligent Automation: Intelligent Process Automation, RPA, Process Assessment, Automation Opportunity Identification, Process Optimization, Digital Transformation, Workflow Orchestration

Process Consulting: Requirement Gathering, Business Process Analysis, Feasibility Analysis, PDD, SDD, Solution Design, Effort Estimation, Stakeholder Management, Client Consulting

AI / GenAI: Generative AI, Agentic AI, LLMs, RAG, Prompt Engineering, AI Orchestration, NLP, Semantic Search, Intelligent Document Processing, OCR

RPA Platforms: Automation Anywhere A360, Bot Creator, Control Room, Bot Runner, UiPath, Bot Deployment, Scheduling, Monitoring, Error Handling

Automation: Web, Desktop, Excel, PDF, Email Automation; Data Processing; Document Extraction; Reporting; Exception Handling

Programming & Integration: Python, SQL, VB Scripting, REST APIs, JSON/XML, MySQL, Git, GitHub

AI / ML: PyTorch, TensorFlow, Scikit-learn, Text Classification, Information Extraction, Embeddings, Transformer Models, Model Evaluation

PROFESSIONAL EXPERIENCE

ASSOCIATE CONSULTANT | ALIGNED AUTOMATION | March 2023 – Present

- Designed and delivered end-to-end intelligent automation solutions using Automation Anywhere A360, Python, NLP, Generative AI, Agentic AI, and LLM-based architectures for enterprise digital transformation initiatives.
- Performed feasibility analysis, requirement gathering, business process analysis, and solution design discussions to identify automation and process optimization opportunities.
- Prepared and contributed to Process Design Documents (PDD), Solution Design Documents (SDD), technical documentation, and automation solution specifications.
- Built scalable automation workflows for web, desktop, Excel, PDF, email, and data-processing processes using A360 and Python scripting.
- Developed and deployed A360 bots and reusable automation components; supported Control Room scheduling, deployment, monitoring, troubleshooting, and production operations.
- Integrated automation workflows with REST APIs and SQL-based data validation to support enterprise business processes and reporting.
- Developed AI/NLP workflows for text classification, information extraction, document understanding, semantic retrieval, and intelligent document processing.
- Built enterprise Generative AI and Agentic AI solutions using RAG, prompt engineering, context engineering, vector databases, embeddings, and AI orchestration frameworks.
- Collaborated with cross-functional teams and enterprise stakeholders to translate business requirements into scalable automation, AI, and machine learning solutions.
- Provided production support, incident resolution, bot monitoring, testing, deployment, and performance optimization for enterprise automation solutions serving clients including Dell and Lilly.

INTERN | ALIGNED AUTOMATION | July 2022 – March 2023

- Developed a Python and AI-based proof of concept for automated resume screening using text preprocessing, tokenization, feature extraction, candidate ranking, and NLP techniques.
- Built automation workflows for Dell TechDirect and Salesforce business processes and participated in testing, debugging, deployment, and documentation.
- Assisted senior consultants with process assessment, automation opportunity identification, workflow optimization, and solution documentation.
- Supported AI model testing, evaluation, deployment, and Python-based workflow development.

KEY PROJECTS

Dell – Fraud Prevention Echo System (FPE)

- Automated fraud detection workflows using Automation Anywhere bots, including data validation, reporting, exception handling, and system integration.
- Improved process efficiency through structured rule-based automation and scalable workflow design.

Dell – TechDirect Automation

- Developed Automation Anywhere A360 bots for Salesforce and TechDirect web applications, automating repetitive web and Excel-based business activities.
- Supported Control Room deployment and production monitoring.

Automations:

1. Bulk Automation
2. Case management Automation
3. Email Automation

Dell – Sustainability Takeback (Asset Return Business - ARB)

- Managed operations and delivery for the ARB region under Dell's Sustainability Takeback program.
- Led regional asset return processes, ensuring operational efficiency and business compliance.
- Data Analysis, Business Analysis , Designed and supporting develop an interactive UI dashboard to enhance data visibility and performance tracking.
- Improved reporting accuracy and decision-making through insightful dashboard analytics and automation.

Lilly – Medical Affairs IT Services (MAIS)

- Served as a Business Analyst, collaborating closely with stakeholders to gather and analyze business requirements.
- Translated client needs into functional solutions and process improvements.
- Designed and developed interactive UI dashboards using Power Automate and PowerPoint.
- Enhanced reporting efficiency, data visualization, and stakeholder decision-making through automated dashboard solutions.

Enterprise Generative AI / Multilingual Document Understanding

- Built AI solutions using RAG, LLMs, prompt engineering, context engineering, embeddings, semantic search, and AI orchestration for intelligent document processing and knowledge retrieval.
- Designed AI data pipelines for multilingual document understanding and intelligent information extraction.

Dell – TechDirect Automation [Dashboard/Sanity]

- Developed web applications, automating repetitive web and Excel-based business activities.
- Reduced manual intervention from 100% to 10%. maintained efficiency and accuracy with zero errors.

EDUCATION

- M.Tech – Robotics and Automation | Symbiosis International University, Pune | 2021–2023
- B.E. – Electronics and Telecommunication Engineering | Swami Ramanand Teerth Marathwada University | 2019

CERTIFICATIONS

- Automation Anywhere A360 Certified Developer
- Python Zero to Hero certification (udemy)
- Generative AI Fundamentals
- Be10x Workshop
- Claude 101(Anthropic)
